

Uniplay

WE ARE UNIPLAY!

WE DO CREATIVE, EDUCATIONAL, BRIGHT,
INNOVATIVE AND INSPIRATIONAL THERMOPLASTIC GRAPHICS.

We are dedicated to transforming outdoor recreational areas into dynamic environments for education, play, fitness and fun. In a world dominated by screens and devices, we want to encourage children (and adults) to run, jump, skip and move around their outdoor spaces.

With over 15 years as the UK's number one provider of preformed thermoplastic graphics, our team of experienced playground imagineers specialise in designing playground graphics that not only develop essential

skills but encourage the increase of activity levels during recreational time.

Our graphics are crafted from premium, non-toxic preformed thermoplastic, ensuring a safe and durable outdoor provision for children and beyond.

With Uniplay, you receive a product that is self-cleaning, extra reflective, and non-slip, keeping children safe during play. Our materials are rigorously tested and compliant with all health and safety regulations, giving you peace of mind.

ABOUT THE TEAM

Our team of playground imagineers, designers and skilled installation personnel are what make Uniplay.... well,

UNIPLAY!

We pride ourselves on designing and delivering the very best playground markings to suit every single setting. Our team is dedicated to going the

extra mile to ensure every playground we design and complete has the uniqueness only Uniplay can deliver.

Our people are creative and customer focussed to ensure we find the very best solutions. Our team work with you to create a bright, colourful outdoor activity hub, from educational maths markings to fitness and activity trails.

1. DESIGN

From our initial discussions or site survey, our design team will create a scale visual of your playground with your desired playground markings. Each playground is completely unique and as such we strive to design a space specific to your needs.

2. QUOTATION

Our quotation is fully itemised so that all items are clearly visible and there are no hidden extras. All of our prices include delivery and installation.

3. ORDER

Once you are completely happy with our design proposals and quotation, we'd love to confirm your order. Once this is complete we will be in contact to arrange an installation period for your playground markings that is convenient to you; usually no more than a couple of weeks away.

4. PRODUCTION

All of our playground markings are designed and cut by our own water jet cutting machines to ensure your graphic has an intricate finish. We have full control over the production process, so should you need and changes to the design, we'd love to help.

5. INSTALLATION

We only use our own, enhanced DBS checked, installations teams to install your playground markings. All of our teams are skilled in the application of thermoplastic to ensure ultimate longevity of your chosen designs.

6. AFTERCARE

To keep your playground markings bright and vivid, we recommend cleaning them periodically. All of our thermoplastic graphics can be cleaned with soapy water or a jet wash from a standing height. Your playground can still be treated with rock salt in the winter months if this would be your normal practice. If you ever need any help or advice, our team are always on hand to assist you.

BOARD GAMES

Board games are a fantastic way to promote independent and team based participation in the playground. Bright, colourful and long lasting, our traditional board games help improve **SOCIAL INTERACTION** and analytical thinking outside the classroom, encouraging children to take turns, solve problems and **STRATEGY BUILD**.

Playground board games can be used to teach a wide range of educational subjects.

The vibrant colours and large-scale designs are attractive to increase interaction and **IMPROVE LOGICAL THINKING**. Playground board games are perfect for any level of education from nurseries to primary schools and young person's clubs.

Diamond Park is a major new public open space for the city of Dublin and Uniplay are proud to work in conjunction with All Play to assist with the transformation of the area.

A series of public workshops carried out over a 3 year period included interactive and engaging activities which allowed the public to express what they wanted from a new city park.

The results from these workshops drove the design process which aims to meet a wide range of needs expressed by members of the public and include increased integration, permeability, accessibility and passive supervision activities for all ages and capabilities, with a particular emphasis on children, youth and the elderly.

Diamond Park, Dublin is in an area identified by The Dublin City Public Realm Strategy to seek 'design opportunities that may reduce crime and anti-social behaviour in an inner urban residential area'.

From sight of the initial brief, Uniplay were able to suggest products to transform the surface areas of the park creating colourful, non slip, multi-use and long lasting decorative surfaces. The design concepts were ambitious, but with the use of Uniplay Endurance High Durability surface covering and preformed thermoplastic playground markings, they posed no issues to achieve.

Uniplay Endurance is a highway grade, anti-slip surface covering designed for areas of high traffic and footfall. The material is hand applied to marked out and taped areas to create visually interesting designs that are suitable for use in all weather.

DIAMOND PARK INSTALLATION

Endurance is designed and manufactured to be used with Uniplay preformed thermoplastic. Our preformed thermoplastic playground markings are cut by water jet cutting machine for a precise, intricate finish. Thermoplastic playground markings is again a highway grade material manufactured with longevity in mind.

The brief underwent numerous changes along the way, through consultations with stakeholders and public groups. The landscape architect and design teams wanted a

specific colour pallet to accompany the wet pour surfacing, this was something we were able to achieve by manufacturing bespoke colours specific to the scheme.

Decorative high durability and preformed thermoplastic markings applied to a tarmac surface is a fantastic way to rejuvenate public spaces, giving great slip resistance and long lasting results whilst being multi functional and not easy to be vandalised.

Uniplay were approached by Paul Belcher, Sports Hub Director of the Tapscott Learning Trust after hearing great things about the work we had done previously at one of the Tapscott schools, Ranelagh Primary School in Stratford, East London.

Paul initially contacted Uniplay to ask about different options for a sports pitch he was creating alongside a huge sporting organisation, the details of which were kept secret initially. After understanding a little about the brief, our Endurance Surface Covering was proposed as an option.

Endurance is Uniplay's own MMA cold plastic surface covering. It's a highway grade coloured high durability surface covering which is anti-slip and long lasting. It's ideal for areas of heavy footfall, and can be used in all weather. Endurance, unlike any paint, has been designed and developed to be used in conjunction with preformed thermoplastic, enabling us to create large coloured designs, particularly sports pitches, with the added benefit of intricate performed designs.

THE RISE OF RANELAGH ROCKETS BASEBALL TEAM

After our initial proposal, Paul and his colleagues were delighted with our suggestions and were then allowed to share further details of the project after completion of a non disclosure agreement.

Paul disclosed that the project he was working on was in fact for Major League Baseball (MLB) who were looking to create an initiative called First Pitch Programme involving 40 schools in London and 200 across the rest of the UK. Working with an initial trial site, MLB wanted to create a legacy following their London Series to roll out across the UK and encourage more children to play baseball. The project involved two baseball teams from the United States coming to play in London.

After several online meetings in quick succession and further understanding of the project, Uniplay finalised designs for a baseball pitch that were approved by the MLB and the project was given sign off by Jon Rye, MLB London Series Legacy Manager, Baseball Softball UK.

The initial project in East London included a full Uniplay Endurance Baseball Court with preformed thermoplastic detail. In keeping with the MLB way, Ranelagh School named their team Ranelagh Rockets and their logo was recreated in thermoplastic to be installed with the pitch. As part of the legacy the MLB London Series logos were also included.

The installation had to be completed with stringent timescales ready for the opening festival featuring Chicago Cubs & St. Louis Cardinals MLB stars from the United States.

Since the completion of the Ranelegh Rockets pitch, Uniplay have been rolled out to be the approved supplier of the London Legacy First Pitch Programme and continue to advocate Baseball in UK schools.

SPORTS PREMIUM

Providing high quality PE and sporting opportunities in school can help improve children's health and wellbeing, personal development as well as academic attainment. Playground markings are a sustainable way to encourage positive and enjoyable participation in regular physical activity throughout your outdoor provision, and help to raise the profile of your PE curriculum across school.

Bright, colourful markings to enhance your sports courts, or activities such as long jumps and active trails can increase engagement amongst all children, and encourage the least active to participate, giving equal access to all pupils. Introducing team games and activities to keep children moving helps to embed physical activity into every school day.

EDUCATION

Our Educational selection of graphics are designed to really bring your classroom outside and **SUPPORT CHILDREN'S LEARNING**. Promoting curiosity and a fascination with our world, our educational range includes historical periods, planets of the solar system, days of the week, modern foreign languages and maps of the world to name but a few.

Educational playground markings help to promote recall and **REPLICATE KEY EDUCATIONAL FACTS** outdoors to establish a cross curricular learning environment.

Uniplay's intricate educational markings can be used by staff to **EXPAND ON LESSON TOPICS**, reinforce learning goals and encourage children to apply what they have learnt while accessing their outdoor provision.

ROADWAYS

Roadway playground markings can **FIT ALL SHAPES AND SIZES** of playgrounds and are a great way to teach and encourage road safety. Our roadway playground markings can **INCLUDE REAL LIFE ELEMENTS** such as zebra crossings, junction markers and road signage while also adding elements such as landmarks.

Our roadways can be used for trikes and bikes, increasing **GROSS MOTOR OPPORTUNITIES** and allowing for bikeability training.

TRADITIONAL GAMES

Traditional playground games including the likes of hopscotch, twister, what time is it mr wolf and noughts and crosses are **TIMELESS ACTIVITIES THAT EVERY CHILD WILL PLAY**. Enhancing these games with long lasting, bright coloured preformed thermoplastic markings ensures they can be played over and over again.

Our collection of innovative games based on traditional concepts are a **KEY FEATURE TO EVERY OUTDOOR PROVISION** and can be played alone or in teams.

Uniplay REMOVALS

We have a dedicated removals team, who focus solely on removing old markings. Their knowledge and experience is second to none, which is required to provide the very best result and service.

Removal of playground markings can be an easy process with minimal disruption when carried out correctly. Whether you need to renovate or remove old markings to create space, Uniplay provides fast and efficient services across the UK. Our comprehensive playground removal services ensure any new thermoplastic graphics being installed have a clean finish and any old, worn designs do not detract from your vibrant new ones.

We have two different removals machines, each working slightly differently depending on your ground condition and the type of markings required to be removed. We have a UHP Water machine and a Vapor Blasting machine, with each different machine designed to do a slightly different job, and our survey team will advise on the very best solution for you.

ENDURANCE SURFACE COVERING

Uniplay Endurance is a highway grade, anti-slip surface covering designed for areas of high traffic and footfall. The material is hand applied to create visually interesting designs that are suitable for use in all weather.

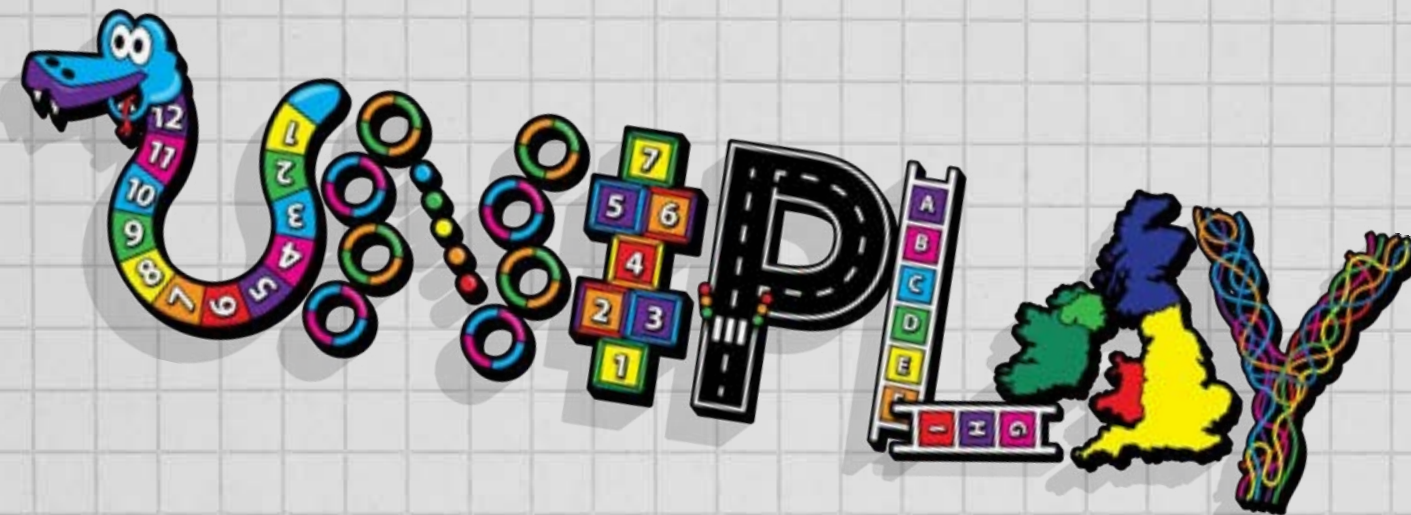

Endurance is designed and manufactured to be used with Uniplay preformed thermoplastic.

Decorative high durability and preformed thermoplastic markings applied to a tarmac surface is a fantastic way to rejuvenate outdoor spaces, giving great slip resistance and long lasting results whilst being multi functional and not easy to be vandalised.
